The DPS REFINEX Laboratory was founded in 1994 and is the most important silicone implant manufacturer in China. We produce

- Silicone gel breast implants
- Facial implants
- Tissue expanders

All the cohesive silicone gel materials are imported from USA with American FDA approval. We are using the most advanced cohesive silicone gel which is also used by other leading laboratories. All the implants are low-bleed shelled which minimizes the silicone gel diffusion. The world's most advanced barrier-coat technology is applied.

#### • Surface

We provide 3 types of surface: **Smooth, textured and micro-textured** which may lower the risk of the capsular contracture.

#### • Fillings

3 types of fillings of cohesive gel are available: 99%, 95% and 85%. They can meet different needs of different surgeons and patients.

We provide a wide range of choices -- 222 round breast implants with a wide variety of sizes and fillings.

All the products are made in GMP factories strictly in accordance with the international quality control system of ISO9001 and ISO13485.

Refinex offers the surgeons and patients more affordable prices for highest quality products.

### Features of Refinex Implants:

#### SAFE

The world's most advanced cohesive silicone gel is used. The special barrier-coat technology prevents the gel leaking. The special textured surface optimizes tissue adherence and minimizes the occurrence of capsular contracture.

#### NATURAL

The cohesive silicone gel has intelligent memory function and will come back to its original forms even after heavy pressure. The softness is very close to breast tissues.

# Contents

I High profile (99% filled).....	1
II High profile (85% filled).....	2
III Middle profile (99% filled).....	2
IV Middle profile (95% filled).....	3
V Low profile (99% filled).....	3
VI Low profile (95% filled).....	4

We provide **Smooth, textured and micro-textured** surface for each size of breast implants. Totally there are 222 choices.

Currently we only produce round breast implants. But our anatomical implants are already available and sizes can be custom-made.

All the products are produced strictly according to ISO9001 and ISO13485. Each product is traceable by a unique tracking number.
